GLOBAL INVASIVE SPECIES DATABASE

EICAT profile: ***Psittacara acuticaudatus***

MC (Minimal Concern)Psittacara acuticaudatus

Date assessed	2021-09-22
Year published	2022
Eicat category	MC (Minimal Concern)
Justification for EICAT assessment	The Blue-crowned Parakeets foraged together, often calling loudly, particularly just before taking flight. Their preferred food items were similar to those of Rose-ringed Parakeets and included, for example, tree buds, shoots and blossom. Blue-crowned Parakeets in the Bromely area have also been observed feeding on peanuts, sunflower seeds and commercial seed mix in nearby gardens.
Confidence rating	Low
Mechanism(s) of maximum impact	Grazing/herbivory/browsing
Countries of most severe impact	United Kingdom
Description of impact	The Blue-crowned Parakeet feeds on native plant species in Britain.
Assessor	Thomas Evans; Tom Allmert
