GLOBAL INVASIVE SPECIES DATABASE

EICAT profile: ***Psittacara mitratus***

MC (Minimal Concern)Psittacara mitratus

Date assessed	2021-10-12
Year published	2023
Eicat category	MC (Minimal Concern)
Justification for EICAT assessment	The Mitred Parakeet has been observed to displace Great Frigatebirds (Fregata minor) from roosting areas and to compete with shearwaters (Puffinus spp) and petrels (Pterodroma spp.) for nesting sites in cliff-side burrows. There is no evidence that this has affected the peformance of these species (MISC 2002).
Confidence rating	Low
Mechanism(s) of maximum impact	Competition
Countries of most severe impact	U.S.A.
Description of impact	The Mitred parakeet competes with native bird species on Maui.
Assessor	Tom Allmert; Thomas Evans
