Common name: yellow fever mosquito (English), stégomyie (French)

Synonym:
- *Culex aegypti*, Linnaeus, 1762
- *Culex albopalposus*, Becker, 1908
- *Culex anguste-alatus*, Becker, 1908
- *Culex annulitarsis*, Macquart, 1844
- *Culex argenteus*, Poiret, 1787
- *Culex augens*, Wiedemann, 1828
- *Culex calopus*, Meigen, 1818
- *Culex elegans*, Ficalbi, 1889
- *Culex exagitans*, Walker, 1856
- *Culex excitans*, Walker, 1848
- *Culex fasciatus*, Fabricius, 1805
- *Culex frater*, Robineau-Desvoidy, 1827
- *Culex inexorabilis*, Walker, 1848
- *Culex insatiabilis*, Bigot, 1859
- *Culex kououpi*, Brulle, 1833
- *Culex rossii*, Giles, 1889
- *Culex taeniatus*, Wiedemann, 1828
- *Culex toxorhynchus*, Macquart, 1838
- *Culex viridifrons*, Walker, 1848
- *Duttonia alboannulis*, Ludlow, 1911
- *Mimeteomyia pulcherrima*, Taylor, 1919
- *Stegomyia atritarsis*, Edwards, 1920
- *Stegomyia canariensis*, Pittaluga, 1905
- *Stegomyia luciensis*, Theobald, 1901
- *Stegomyia nigeria*, Theobald, 1901
- *Stegomyia queenslandensis*, Theobald, 1901

Similar species

Summary: The yellow fever mosquito *Aedes aegypti* is very common in urban and suburban areas in the tropic and subtropic regions. It is adapted to close association with humans and the female feeds almost exclusively on human blood. *A. aegypti* is the domestic vector of the yellow fever virus, caused epidemics of yellow fever in the Americas (before the 1940's) and recently in West Africa, and is responsible for ‘urban yellow fever’ - direct transmission of the virus between humans. *A. aegypti* is also the most important carrier of the dengue virus, although it is not particularly susceptible to viral infection compared with other mosquito species.

Summary: This compilation of information sources can be sorted on keywords for example: Baits & Lures, Non Target Species, Eradication, Monitoring, Risk Assessment, Weeds, Herbicides etc. This compilation is at present in Excel format, this will be web-enabled as a searchable database shortly. This version of the database has been developed by the IUCN SSC ISSG as part of an Overseas Territories Environmental Programme funded project XOT603 in partnership with the Cayman Islands Government - Department of Environment. The compilation is a work under progress, the ISSG will manage, maintain and enhance the database with current and newly published information, reports, journal articles etc.
