

## *Anolis lineatus*

**System:** Terrestrial

Kingdom	Phylum	Class	Order	Family
Animalia	Chordata	Reptilia		Polychrotidae

**Common name** striped anole (English)

**Synonym** *Lacerta strumosa* , Linnaeus, 1758  
*Ptychonotus (Trachycoelia) lineatus* , Fitzinger, 1843  
*Norops lineatus* , Savage & Guyer, 1991  
*Anolis lineatus* , Daudin 1802: 66  
*Anolis lineatus* , Dumeril & Bibron 1837: 146  
*Anolis lineatus* , Boulenger 1885: 38  
*Anolis lineatus* , Cope 1885: 181  
*Norops lineatus* , Nicholson 2002 ♦

## Similar species

**Summary** Native to Curacao and Aruba in the Netherlands Antilles, *Anolis lineatus* is not widely distributed in its known introduced range of Suriname. The potential impacts of this species are not well known.

[view this species on IUCN Red List](#)

## Species Description

*Anolis lineatus* has no distinct nuchal or dorsal crest consisting of high, pointed scales; its scales on the upper surface of the snout are smooth (Hoogmoed, 1981). The tail has a serrated crest and the tibia in adult specimens is shorter than the distance between the tip of the snout and the posterior margin of the ear (Hoogmoed, 1981). Body colour is grey with two longitudinal black stripes on the flanks and the dewlap is yellowish-orange with a black centre (Hoogmoed, 1981).

## Habitat Description

In the garden on Suriname where *Anolis lineatus* had established a viable population, it was noted that they inhabited wooden and concrete poles of a fence and tree trunks (Hoogmoed, 1981). In its native range on Curacao, *A. lineatus* is known to occupy tree trunks in original vegetation as well as urban settings on fences, gardens and walls (Hoogmoed, 1981).

#### Management information

[IUCN/SSC Invasive Species Specialist Group \(ISSG\), 2010. A Compilation of Information Sources for Conservation Managers.](#)

**Summary:** This compilation of information sources can be sorted on keywords for example: Baits & Lures, Non Target Species, Eradication, Monitoring, Risk Assessment, Weeds, Herbicides etc. This compilation is at present in Excel format, this will be web-enabled as a searchable database shortly. This version of the database has been developed by the IUCN SSC ISSG as part of an Overseas Territories Environmental Programme funded project XOT603 in partnership with the Cayman Islands Government - Department of Environment. The compilation is a work under progress, the ISSG will manage, maintain and enhance the database with current and newly published information, reports, journal articles etc.
