Ageratina riparia 简体中文 正體中文 **System:** Terrestrial

Kingdom	Phylum	Class	Order	Family
Plantae	Magnoliophyta	Magnoliopsida	Asterales	Asteraceae

Common name

Synonym *Eupatorium riparium* , Regel

Similar species

Summary Ageratina riparia is a popular ornamental plant that has been widely spread from its home region in Central America. It is naturalised in many tropical regions of the world and is invasive in some such as Hawaii, Australia and the islands of the Indian Ocean. It can form dense quasi monospecific stands which crowd out native plants, limiting their regeneration.
