Julus luscus , var. *homalopsis* Latzel, 1886
Julus oweni , Bollman, 1887
Allajulus frisius , (Verhoeff, 1891)

Similar species

Cylindroiulus britannicus

Summary

Cylindroiulus latestriatus is a detritivore, an important regulator of ecosystem nutrient cycling processes. It's introduction to Gough Island (Tristan Islands, Tristan da Cunha, UK) may cause long-term effects on nutrient cycles by speeding up organic cycling and reducing the production of peat, changing floral and faunal assemblages.

Species Description

Cylindroiulus latestriatus is a millipede: Epiproct short and blunt, not protruding beyond margins of paraprocts; latter with 3 marginal setae apiece; gonopods and paraproct setation as shown by Blower (*Records of the Hawaii Biological Survey* 1997).

Habitat Description

Cylindroiulus latestriatus a soil and litter dweller (Holdgate 1965), is found in leaf, moss, fern and tree fern litter; found under moist leaves along roadside (*Records of the Hawaii Biological Survey*, 1997). On Gough Island *C. latestriatus* was never taken above 1000 ft; uplands the soils are much more compact, more mineral, and shallower than those of loose peats of the fern-bush (Holdgate 1965).

Management information

[IUCN/SSC Invasive Species Specialist Group \(ISSG\), 2010. A Compilation of Information Sources for Conservation Managers.](#)

Summary: This compilation of information sources can be sorted on keywords for example: Baits & Lures, Non Target Species, Eradication, Monitoring, Risk Assessment, Weeds, Herbicides etc. This compilation is at present in Excel format, this will be web-enabled as a searchable database shortly. This version of the database has been developed by the IUCN SSC ISSG as part of an Overseas Territories Environmental Programme funded project XOT603 in partnership with the Cayman Islands Government - Department of Environment. The compilation is a work under progress, the ISSG will manage, maintain and enhance the database with current and newly published information, reports, journal articles etc.
