

Lithobates clamitans

System: Freshwater_terrestrial

Kingdom	Phylum	Class	Order	Family
Animalia	Chordata	Amphibia	Anura	Ranidae

- Common name** Green frog (English)
- Synonym** *Rana flaviviridis* ,Harlan, 1826
Rana clamitans ,Latreille in Sonnini de Manoncourt and Latreille, 1801
Rana clamitans melanota ,Rafinesque, 1820
Rana clamitans clamitans ,Latreille in Sonnini de Manoncourt and Latreille, 1801
Ranaria melanota ,Rafinesque, 1820
Lithobates clamitans clamitans ,(Latreille in Sonnini de Manoncourt and Latreille, 1801)
Lithobates clamitans melanota ,(Rafinesque, 1820)
Rana clamata ,Sonnini de Manoncourt and Latreille, 1801
Rana calamitans ,Sonnini de Manoncourt and Latreille, 1801
Rana fontinalis ,LeConte, 1825
Rana horiconensis ,Holbrook, 1838
Rana nigricans ,Agassiz, 1850
Rana clamator ,Latreille in Sonnini de Manoncourt and Latreille, 1801

Similar species

Summary *Lithobates clamitans* is found to be an opportunistic predator. Predation of *Clemmys guttata* hatchlings by this species has been reported once, as also the predation of a brown bat (Vespertilionidae) in its native range of Canada.

Habitat Description

"It can be found on the margins of virtually any body of permanent or semi-permanent water; young may use temporary pools. It may disperse from water in wet weather, especially at night. It seeks cover under objects on land, underground, or in water when inactive. Eggs and larvae develop in shallow, slow- or non-flowing water. It is unclear as to whether or not it is tolerant of habitat disturbance" (IUCN SSC Amphibian Specialist Group, 2022).
