

MN (Minor) *Estrilda astrild*

<b>Date assessed</b>	2021-10-04
<b>Year published</b>	2022
<b>Eicat category</b>	MN (Minor)
<b>Justification for EICAT assessment</b>	The Common Waxbill feeds on native insect species. There is no evidence that this has caused declining population of these species (Sanz-Aguilar et al. 2015).
<b>Confidence rating</b>	Low
<b>Mechanism(s) of maximum impact</b>	Predation
<b>Countries of most severe impact</b>	Spain
<b>Description of impact</b>	The Common Waxbill feeds on native insect species. To date it has a negligible competition impacts on native bird species.
<b>Assessor</b>	Thomas Evans; Tom Allmert
<b>Contributors</b>	
<b>Reviewers</b>	EICAT authority
