EICAT profile: Porphyrio porphyrio

MN (Minor)Porphyrio porphyrio

Date assessed	2021-10-05
Year published	2023
Eicat category	MN (Minor)
Justification for EICAT	
assessment	The Purple Swamphen has been observed feeding on native snails and earthworms. There is no evidence that predation by the Purple Swamphen has caused the decline of these species (Pranty et al. 2005, Johnson and McGarrity 2009).
Confidence rating	Low
Mechanism(s) of	
maximum impact	
Countries of most severe	U.S.A.
impact	
	The Purple Swamphen feeds on native snail, earthworm and plant species in Florida. It was also observed competing with native bird species.
Assessor	Tom Allmert; Thomas Evans
