

MN (Minor) *Cairina moschata*

<b>Date assessed</b>	2021-11-29
<b>Year published</b>	2022
<b>Eicat category</b>	MN (Minor)
<b>Justification for EICAT assessment</b>	The Muscovy Duck has been reported to hybridize with the Mallard ( <i>Anas platyrhynchos</i> ) in the wild, but there is no evidence that this has caused a decline of this species (Lever 2009).
<b>Confidence rating</b>	Low
<b>Mechanism(s) of maximum impact</b>	Hybridisation
<b>Countries of most severe impact</b>	France
<b>Description of impact</b>	The Muscovy duck hybridizes with mallards in France.
