MO (Moderate)Corvus brachyrhynchos

Date assessed	2021-11-10
Year published	2022
Eicat category	MO (Moderate)
Justification for EICAT assessment	The American crow preys on the eggs and chicks of White-tailed Tropicbirds on Bermuda. This predation is likely to be causing declines in populations of the native species (Madeiros 2011).
Confidence rating	Medium
Mechanism(s) of maximum impact	Predation
Countries of most severe impact	Bermuda
Description of impact	American crows prey on the eggs of white-tailed tropic birds on Bermuda. Crow predation rates of white-tailed tropicbirds varies across years on offshore island sites on Bermuda.
