

MN (Minor) *Anser caerulescens*

| | |
|---|---|
| Date assessed | 2021-10-21 |
| Year published | 2022 |
| Eicat category | MN (Minor) |
| Justification for EICAT assessment | Hybridisation of the Snow Goose with both Greylag Geese (<i>Anser anser</i>) and Barnacle Geese (<i>Branta leucopsis</i>) has been recorded in the wild. There is no evidence that this has caused a decline of these species (Banks et al., 2008, Ottenburghs et al., 2016). |
| Confidence rating | Low |
| Mechanism(s) of maximum impact | Hybridisation |
| Countries of most severe impact | Netherlands; United Kingdom |
| Description of impact | The Snow Goose hybridizes with the Greylag Goose and Barnacle Goose in Europe. |
