

MN (Minor) *Dacelo novaeguineae*

| | |
|---|--|
| Date assessed | 2021-10-08 |
| Year published | 2022 |
| Eicat category | MN (Minor) |
| Justification for EICAT assessment | The Laughing Kookaburra preys on various native species, for example lizards, birds or invertebrates. There is no evidence that this has caused a decline of these species (Perrot 2010, Te Ara - The Encyclopedia of New Zealand 2015). |
| Confidence rating | Low |
| Mechanism(s) of maximum impact | Predation |
| Countries of most severe impact | New Zealand |
| Description of impact | The laughing kookaburra preys on various native species in New Zealand. |
