

MN (Minor) *Dendrocygna arcuata*

Date assessed	2021-10-18
Year published	2023
Eicat category	MN (Minor)
Justification for EICAT assessment	Hybrids between the Wandering Whistling-duck and the Lesser Whistling-duck (<i>Dendrocygna javanica</i>) have been observed and documented in the wild in Singapore. There is no evidence that this has caused a decline of populations of Lesser Whistling-duck (singaporebirds 2012, Chong 2015).
Confidence rating	Low
Mechanism(s) of maximum impact	Hybridisation
Countries of most severe impact	Republic of Singapore
Description of impact	The Wandering Whistling-duck hybridizes with the Lesser Whistling-duck in Singapore.
