

**MN (Minor)** *Dendrocygna arcuata*

<b>Date assessed</b>	2021-10-18
<b>Year published</b>	2023
<b>Eicat category</b>	MN (Minor)
<b>Justification for EICAT assessment</b>	Hybrids between the Wandering Whistling-duck and the Lesser Whistling-duck ( <i>Dendrocygna javanica</i> ) have been observed and documented in the wild in Singapore. There is no evidence that this has caused a decline of populations of Lesser Whistling-duck (singaporebirds 2012, Chong 2015).
<b>Confidence rating</b>	Low
<b>Mechanism(s) of maximum impact</b>	Hybridisation
<b>Countries of most severe impact</b>	Republic of Singapore
<b>Description of impact</b>	The Wandering Whistling-duck hybridizes with the Lesser Whistling-duck in Singapore.
