GLOBAL INVASIVE SPECIES DATABASE

EICAT profile: ***Eupsittula pertinax***

DD (Data Deficient)Eupsittula pertinax

Date assessed	2021-09-22
Year published	2022
Eicat category	DD (Data Deficient)
Justification for EICAT assessment	It is not known if this introduced population has had any effects on resident species. No other parrots occur on San Andrés Island (McNish 2003), but it is plausible that Brown-throated Parakeet could compete for food with other large frugivores, such as resident pigeon species (Donegan and Huertas 2011).
Confidence rating	
Mechanism(s) of maximum impact	Competition
Countries of most severe impact	Colombia
Description of impact	
Assessor	Thomas Evans; Tom Allmert
Contributors	
Reviewers	EICAT authority
Recommended citation	Thomas Evans; Tom Allmert. (2026). *Eupsittula pertinax* . IUCN Environmental Impact Classification for Alien Taxa (EICAT).
