

MN (Minor) *Prunella modularis*

Date assessed	2021-10-06
Year published	2023
Eicat category	MN (Minor)
Justification for EICAT assessment	Dunnocks feed mainly on insects and other small invertebrates. There is no evidence that this has caused a decline of these species (Santos 2013).
Confidence rating	Low
Mechanism(s) of maximum impact	Predation
Countries of most severe impact	New Zealand
Description of impact	The Dunnock feeds on native invertebrate species in New Zealand.
Assessor	Tom Allmert; Thomas Evans
Contributors	
Reviewers	EICAT authority
Recommended citation	Tom Allmert; Thomas Evans. (2026). <i>Prunella modularis</i> . IUCN Environmental Impact Classification for Alien Taxa (EICAT).
