

MN (Minor) *Sinosuthora webbiana*

<b>Date assessed</b>	2021-09-30
<b>Year published</b>	2023
<b>Eicat category</b>	MN (Minor)
<b>Justification for EICAT assessment</b>	Vinous-throated parrotbills feed on native insects in Italy and the Netherlands. There is no evidence that this has caused a decline of population of insect species (Luoni 2009, Lensink and van der Have 2013).
<b>Confidence rating</b>	Low
<b>Mechanism(s) of maximum impact</b>	Predation
<b>Countries of most severe impact</b>	Netherlands; Italy
<b>Description of impact</b>	The Vinous-throated Parrotbill feeds on native insect and plant species. It has an overlap in diet with native bird species in Italy.
